Sliced Thin by The Editor

ALEX. H. WASHBURN

Highway Marking Still Inadequate

Out-of-state automobile drivers fall into dangerous practices while rolling across Arkansas on U. S. 67—and part of the blame rests with our state for building high-speed roads without adequately marking them.

Finland Denies Peace Move With Russia

Says Fight Not Finished But Fail to Say Nation Wouldn't Settle

HELSINKI, Finland — (AP) — Commander General K. O. Oesch in a victory address to battle-scarred Finland Monday declared "our fight is not finished, because ancient Finnish soil is still in Russian hands."

Taking cognizance about speculation on the Finnish war policy the General said "although by the conquest of Viipuri the dictated Moscow peace is no more there still is Finnish soil to be regained."

"May your success give you strength to carry the task to a final conclusion," he said.

(General Oesch did not go so far, however, as to declare that Finland would not be willing to negotiate a separate peace with Russia once all Finnish territory is regained.)

The fact that the general publicly spoke of Finnish determination to fight on yet for awhile, implies that any peace feelers originated from the Russian side and that the Finns took this as a means of replying.

The Finns have denied they started any peace negotiation.

At the Viipuri celebration the same battle worn Finnish flag which was lowered mournfully March 13, 1940, was raised again to the top of the historic castle.

On the previous occasion it was General Oesch who had consoled his defeated garrison, declaring "we shall save the flag until it is restored to its old place."

The ruined city was retaken by Finland last Saturday.

Proving Ground Worker Killed

W. W. Wilson Dies in Highway Collision Sunday

WILMINGTON — William Woodrow Wilson, 27, of Slater, Mo., was killed in a car-truck collision on a curve on Highway 65, about four blocks from the Harrison business section, at 6:30 a. m. Sunday. He was removed to the Harrison clinic and died 30 minutes later without regaining consciousness.

Wilson, employed by the W. E. Callahan Construction Company at the Hempstead county proving grounds was driving toward Harrison alone. Officers said he evidently fell asleep or his front left tire blew out, causing his car to swerve and sideswipe a truck driven by Ralph Lowery of Harrison, throwing his car into a ditch. Physicians said his body was crushed.

He was en route home for the week-end holidays. His car was wrecked. Surviving are his wife and a son, Mr. and Mrs. Ed Wilson, and two brothers, all of Slater; three sisters of Washington, D. C. and another brother in Texas.

Some young men will be glad to get back to school. Others know they can't make the team.

Granum Crackers

Unique Ukraine Stalled in the north of Russia, German blitz armies turned their secondary attacks on the rich Ukraine, one of the world's most fertile agricultural and industrial regions. Front page stories have tried the answers to these questions about the Ukraine.

What is the capital of the Ukraine and what is its principal port?

By what nickname is the growing Ukraine known?

What four great Russian rivers flow through the Ukraine?

What is the Ukraine town named for a great Soviet leader?

What state does the Ukraine border with in size?

Lost U. S. Army Equipment to Be Returned

Federal Offense for Civilians to Be Found With Army Articles

Tired and dusty soldiers camping out in the brush, or marching down country roads, have lost a considerable amount of U. S. Army equipment here during the Army maneuvers—but this is one time finders aren't keepers!

The U. S. Army Land Board with headquarters in the Hempstead county courthouse pointed out Monday that it is a federal offense for any civilian to be found in possession of U. S. Army property.

The Land Board said that the Army has lost the following items:

Rifles, revolvers, gas-masks, picks, shovels, belts, leggings, and similar articles of clothing or equipment used by the 100,000 soldiers who participated in the August maneuvers in southwest Arkansas.

Local citizens finding such articles should bring them promptly to one of the following places:

U. S. Army Land Board, Hempstead county courthouse.
Hamilton store, at Columbus.
A. N. Stroud, Washington.
Foster Hardware store, Blevins.
Duffie Hardware store, Hope.
Ward General store, Putnos.

Soldiers Paid 16 Millions

Store Keepers Unable to Supply Needs of Men

WITH THE ARMY IN ARKANSAS AND LOUISIANA — (AP) — With more than \$16,000,000 in their pockets the nearly 400,000 soldiers of the Second and Third armies massed in the two states went on spending sprees Monday that emptied hundreds of store shelves.

It was a holiday for the soldiers and hundreds of merchants who ordinarily would have closed kept their establishments open in the maneuver area.

Refreshment stores sold their stock quickly in most of the small towns and even in some of the larger cities. Owners found long lines of soldiers outside their doors and movie houses were packed as well as other amusement centers.

The holiday coincided with the mid-maneuver payday during the week-end. The payroll, was one of the largest ever turned loose at one time in the two states and because of the necessity of guarding the vast movement of cash the units were paid on a schedule staggering over five days.

Merchants, unprepared for the rush were overwhelmed with business. Many of them sold in one day as much as they ordinarily did in an entire year—especially the country store dealers.

Towns within the area were packed with soldiers looking for some place to spend their wages but because of the crowds many were unable to buy what they wanted.

Out of every 100 drug addicts in the United States today, 80 are men. Nine rabbits will eat as much as two sheep.

U. S. Producing 5 Tanks Daily a Month Ahead of Schedule, Where Corn-Field Stood Only Year Ago

Medium 30-Tonners Coming Off Line With U.S. Efficiency

By WILLIS THORNTON
NEA Service Staff Correspondent
DETROIT — Whether the Yanks are coming is still a matter of acrid debate, but be sure of this: the tanks are coming.

Most newspaper stories don't have a sequel, or the sequel remains untold. But here is a sequel to the story told last January to Milton Bronner, NEA Service staff correspondent, by Edward J. Hunt of Chrysler. Hunt, standing amid the gaunt structure of the half-finished Chrysler tank plant, with only a wooden mockup of the tank that was to be, said, "Five tanks a day by early fall."

Today Hunt stood at one end of the vast five-block-long tank plant, and watched medium 30-ton tanks come slowly clanking and lumbering down three parallel assembly lines. It isn't fall yet, and at least five of these monsters roar off the end of those lines every day under their own power, guns emplaced, and begin the 75 miles of testing they get before being shipped off to American camps.

"We've got it licked," says Hunt proudly. Installation of further machines in addition to the 1000 brand new ones now clanking and shearing and punching and riveting in the plant, polishing of processes, and addition of another 4000 men to the 6000 now at work, will step up that production this winter to 15 a day. Today, 120 a month; this winter, 360 a month from this one Chrysler plant which was a corn field 11 months ago. And this medium tank is also being built by American Locomotive, Pullman, and Pressed Steel Car, with Lima Locomotive coming into production in the later fall. The tanks are really coming.

Schedule Has Been Far Surpassed
Here's how the sequel worked out since January:

They talked then of 25-ton tanks. These are better than 30.

They talked of 5000 men. Six thousand are already working, and 250 a day are being hired, looking toward 10,000.

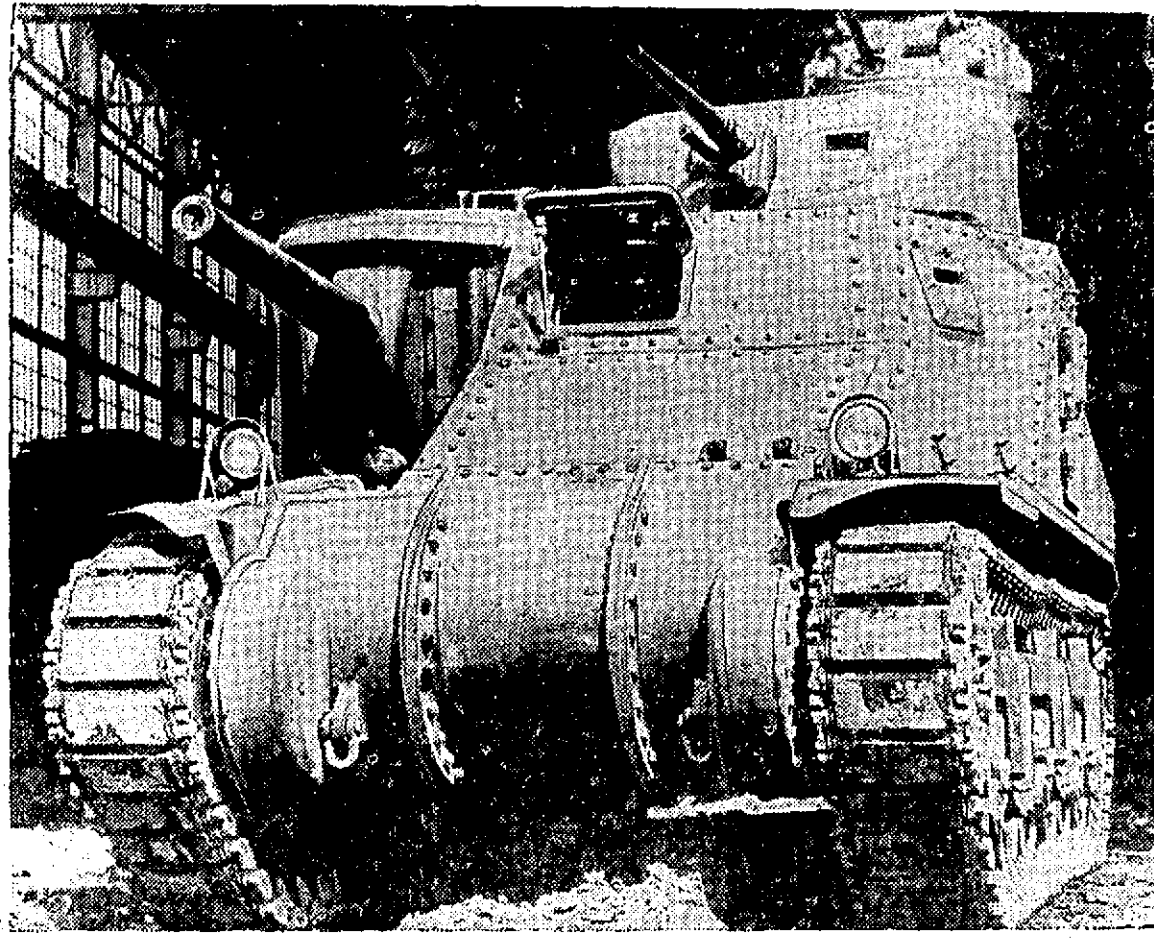

They talked of actual tanks being early fall. Already the tanks have been rolling off the lines for several weeks.

Incidentally, the Army is tightening up all the time on information about its new developments. There are new things in the making, but the nearest you get to it is in hints like Chrysler President K. T. Keller's: "A little while ago our engineers designed a new type of animal running on four tires that is really phenomenal, and we are very much gratified to see how well it went through its preliminary tests. I believe you are about to see quite a change in the appearance of some of the vehicles that are going to be used in this war."

How about heavy tanks—the 75-ton monsters which have been seen to some extent in Europe? Try to find out. Ordnance officers are coy on the subject. What you get is guarded words like: "We aren't sure that those big, clumsy, slow things are what's wanted. The speed of the modern blitz leaves them behind. They sound attractive to the uninformed, but their practical value is sharply questioned. What's needed now is these mediums—and we're getting them."

Team-Work in Building Bombers
The automobile industry is gradually swinging in on the airplane problem, too. In another vast new plant with 635,000 feet of floor space, Chrysler is also beginning installation of

(Continued on page three)

Medium tanks like that above are clanking off three new assembly lines at the Chrysler Corp.'s Detroit plant at the remarkable rate of five a day—way ahead of schedule. By winter the figure will be 15 a day.

Russians Land in Alaska

47 Soviet Airmen En Route to Washington

NOME, Alaska — (AP) — Forty-seven uncommunicative Russians bearing diplomatic passports stepped ashore in this Arctic town Sunday night from two huge flying boats apparently on a secret mission to the United States.

The group admitted leaving Moscow last Thursday and that they were en route to Washington via Anchorage, Sitka and San Francisco. They left many questions unanswered.

For instance they didn't say whether they started the 6,000 mile trip on Nome time or Moscow time. If Moscow time they were five days on route and if Nome time only 4 days.

No names were offered by the airmen except to custom officials who validated the diplomatic passports which allowed the Russians unusual privileges.

RAF, Nazis Step Up Aerial Offensives

LONDON — (AP) — The British RAF and the German Luftwaffe stepped up aerial offensives overnight as the British smashed hard at the Rhine and Rhineland industrial centers of Essen and Cologne and the Germans bombed Hull.

In operations which the British carried out despite the weather the air ministry said a considerable force of RAF bombers carried out the attack on Germany.

Bobcats Get Equipment

Practice Sessions Are Held Daily at 7 o'Clock

With the first game less than two weeks off the Hope High School Bobcats will begin work in earnest here Monday afternoon, Coach Foy Hammons announced.

Equipment has been issued to 15 or 20 youths already and more prospects are expected to turn out daily. Practice actually began last Thursday afternoon with mostly last year's lettermen reporting. Each day the number has increased, Hammons said.

The Bobcats begin a twelve game schedule on the home field Friday night, September 12, with Haynesville, La.

Practice sessions are held daily at 7 o'clock p. m.

Today's Slight Mistake

HELENA, Mont. — (AP) — It's a question whether the lady or the copper was frightened the most.

She went on a vacation and asked the police to keep check on her house while she was gone.

The officer on the beat tried the door, several nights later, and found it opened.

He walked in, turned on the light and stepped into a bedroom.

A blood-curdling yell came from the bed. The lady was in it.

She had returned unexpectedly but failed to notify the officers.

Most of the iron ore found in the Lake Superior region is a reddish variety known as hematite.

SPG Offices Vacate School

Move to Temporary Buildings on Proving Ground Site

The Hope high school building seemed empty and silent Monday after housing for two months some 400 office workers of the Southwestern Proving Ground.

True to his promise the commandant of the Proving Ground vacated the building on exactly the day he said he would, setting up offices in temporary buildings on the Proving Ground site.

Meanwhile workers were busy Monday cleaning the building and getting ready for the opening of school, September 22, as previously announced by Miss Beryl Henry, superintendent of the public schools.

Behind Volga Is Another Russia

Ural Mountain Zone Can Supply Soviet Indefinitely

By MORGAN M. BEATTY
AP Feature Service Writer
WASHINGTON — Back of the Volga lies a new heart of Russia capable of pumping lifeblood to the Soviet war machine almost indefinitely.

It's the Ural Mountain industrial zone, created by the Communists during the last 20 years, and designed to meet a need that now looms up—A second line of defense against a European invader.

Some American experts on Russian economics believe that more than 60 per cent of Russia war industry has already been shifted back of the Volga, securely protected by the famous mountains dividing Asiatic and European Russia.

The Urals have been known for centuries to hold mineral resources and their iron deposits have been worked on a small scale for hundreds of years. The timber of the region may be reduced to charcoal, and the iron smelted that way. That antiquated method is still employed in some remote areas.

The Bolsheviks early appreciated the possibilities of the Ural Mountain region, sent scientists to ferret out possibilities. They returned with glowing reports of vast resources. Large coal deposits were found at Kizel. The potash deposits at Solikamsk, they said, totaled about 18,000,000,000 tons. Potash is a primary element of explosives and fertilizers.

They predicted a fourth world war. They predicted that the oil deposits of the Urals were probably more extensive than those of the Caucasus.

'Crush Hitler' Is Theme of Labor Day Talk

President Pledges Effort; Declines to Say U. S. Should Enter War

HYDE PARK — (AP) — President Roosevelt said Monday that "we shall do everything in our power to crush Hitler and the Nazi forces."

The president did not define "everything," and nowhere in his Labor day address to his countrymen did he go so far as to say the United States once more should go to war.

Yet he went further than ever before in pledging Americans "to do our part in conquering the forces of insane violence let loose by Hitler upon the world."

Must Sacrifice
The president spoke with a grimness signed to bring home more sharply the realization of the threat which he said had been raised by Hitler's violence in an attempt to rule the world.

He said the people must sacrifice but did not say how much.

At one point he asserted "there has never been a moment when Americans were not ready to stand up as free men and fight for their rights."

The address was made by radio from the library here on a program sponsored by the Office of Production Management. Other speakers were Ernest Bevin, Labor Minister in London, Sydney Hillman, associate director of OPM, William Green, AFL president and James B. Carey, secretary of the CIO.

U. S. to Do Part
"We are engaged on a grim and perilous task," Roosevelt warned "as forces of insane violence have been let loose by Hitler upon this earth."

"We must do our full part in conquering them for these forces may be unleashed on this nation as we go about protecting our country."

"The task of defeating Hitler may be long and arduous."

"There are a few appeasers and Nazi sympathizers who say it cannot be done and have asked me to pray for crumbs of a victorious Hitler—they do in fact ask me to become a modern Benedict Arnold and betray all I hold dear—my devotion to my freedom—my freedom—and this, of course, I have rejected."

"Instead I know now I speak the determination of the American people when I say we will not give in."

Winant Knows Nothing
LONDON — (AP) — Rumors that a separate Russian-Finnish peace was being explored came from many quarters in Europe Monday but U. S. ambassador to England, John G. Winant, denied the report that he was playing the central role.

"I know nothing of any plan to have me act as intermediary in any Russian-Finnish negotiation," Winant said.

Russians Take the Offensive

Germans Admit Soviet Offense on Central Front

By the Associated Press
A crescendo in the Russian-German conflict—a glimmering rumor of a separate peace for Finland and intensification of sea and air battle between Britain and the Axis and an uneasy armistice in the British-Russian invaded Iran—marked Monday the second anniversary of the European war.

The Germans acknowledged the Russians had taken the offensive along the Dnieper south of Kiev where they said a continued attempt by Russians to recross the river with the support of gunboats had been repulsed.

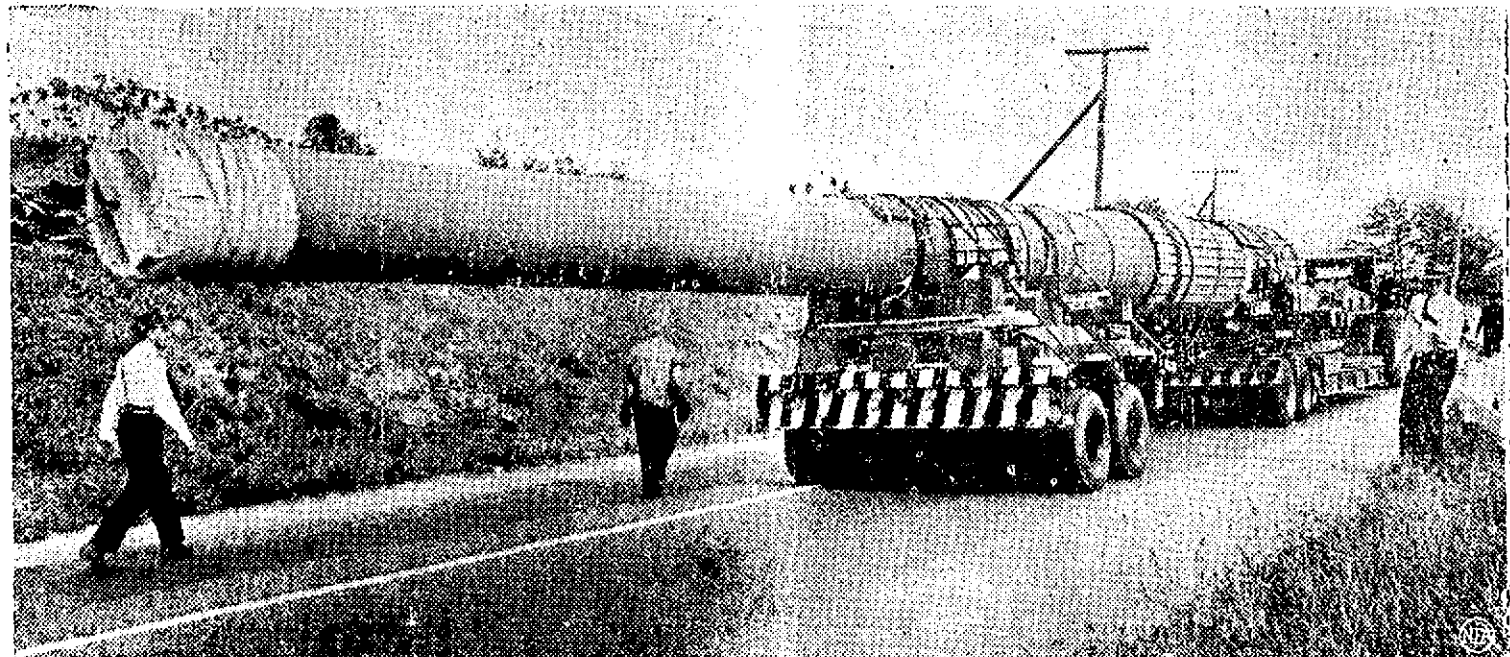

The German high command said that 27 Russian gunboats had been destroyed on the Dnieper river north of Kiev.

Still another Red army counter-offensive was said to have been checked in an undesignated sector and 86 of the numerous tanks employed were said to have been destroyed including 8 of the 52-ton variety. The counter-offensive was reported by DNB, official German news agency.

On this day, the start of the 11th week of the Russian campaign, the German high command announced the capture of 1,432 Red prisoners, 239 cannons, 91 tanks, 2 armored trains and much material—in recent battles in which the Germans wrested the Estonian capital of Tallinn from the Russians.

Adolf Hitler's headquarters reported the U-boat destruction of 4 merchantmen from a British convoy in the Atlantic and in the Gulf of Finland more than 60 Russian ships were

Great Gun Hogs Highway, but Will Guard Our Eastern Shores

This huge coast defense rifle makes a road hog of itself as it follows the white line at the rate of two miles an hour, from Tiverton, R. I., to Fort Church for installation, but it means more defense for our Atlantic shores. The big gun is 68 feet long and weighs 145 tons.

SOCIETY

Daisy Dorothy Heard, Editor Telephone 768

Social Calendar

Monday, September 1st
W. A. of the First Baptist church, meet at the church, 6 o'clock.

The Methodist W. S. C. circles will not meet this week, but will meet in a group Monday, September 8th.

The Joe Vesey Circle of the Wesleyan Guild will not meet this week, but will meet on September 8.

Tuesday, September 2nd
The Woodmen Circle, Grove 196, will meet at the Woodmen hall to make plans for the district meeting which is to be held in Hope on October 7, 7:30 o'clock.

Fall Nuptials and Engagements
Claim Social Spotlight

Claiming interest in the city today is the announcement made by Mr. and Mrs. Walter L. Carter of the marriage of their daughter, Mary Nell, to McDowell Turner, son of Mr. and Mrs. John Turner.

The marriage rites were read by the Reverend Kenneth L. Spore at the First Methodist church on Saturday evening, August 30. Jack Turner served his brother as best man. Only relatives and close friends were present.

Following the ceremony the young couple left for a short wedding trip to Hot Springs.

Both the bride and bridegroom are graduates of Hope high school and later attended Henderson State Teachers' College at Arkadelphia.

Mr. and Mrs. H. Frank Valentine of Fort Smith have announced the engagement and approaching marriage of their daughter, Helen, to James D. Montgomery, Jr., of Little Rock, son of the Reverend and Mrs. J. D. Montgomery of El Paso.

The full wedding will take place in the chapel of the Fort Smith Methodist church.

Army Rides on Fusion Ticket

\$10,000 Month Men Give It Up for \$21 Per Month

By JOHN GROVER
BREEZY HILL, La. — "This man's army" is a familiar phrase. Doesn't mean much. But when you turn it around it's vital. "This army's men" means something.

An army is more than black arrows on a battle map. It's men—your cousin Frank, Tony the grocery boy, Joe College himself.

What sort of men are in our new army? Take a cross-section of a typical company in a typical brigade in a typical division; Headquarters company, 62nd brigade, 31st division.

I go with this gang from Florida to Louisiana, eat with them, sleep with them, write them 24 hours a day. Here's what a few of them are like.

Take Pvt. Glenn Lindgren, six-feet-two and so skinny he'd make a lath wear a giraffe in comparison. Call him "Spider." He's 24, from Pahokee, Fla. He's the sort of handsome that makes talent scouts reach for a contract. "Spider" owner of a \$10,000-a-month service station until Mr. Whiskers called his number. He came without a squawk. Drives a command car now.

The 62nd's boss man is Brig. Gen. J. C. Huthinson. He's a famous Florida sportsman. Knows every deer and wild turkey by its first name. Smokes black new-lath cigars. You'd expect his junior officers to praise him, talking to a reporter. They do. What's more important, when you start shooting the breeze with his enlisted men over a beer, they rate the old man even higher.

Examples: the outfit was driving through the home town of one drafted man. His mother and sister were out in the road. Had a cake for the kid. The column couldn't stop. They were disconsolate when the old man drove by. He got the story and delivered the cake personally.

They tell you how he often pitches horseshoes with enlisted men in camp. Don't get notions he's a softy, though. They say he skips one honest mistake with a correction. But make it twice and you wish you hadn't, but quickly.

"Plenty soldier," they say. You get the idea you'd probably be salvaging some of your favorite teeth if you questioned their estimate of the boss man.

The general's driver is Pvt. Charlie Parrier, a little blond from Prattville, Ala. Nicknamed "Bruiser" since a girl along the line thought he was too young for the army and should be in the Boy Scouts.

"Bruiser" is in love. Telephoned his girl three times and wrote her twice on the trip from Prattville to Camp Blanding. Once he talked \$6.70 worth long distance and didn't have the money to pay it all. They said him, but they say this little furniture truck driver is tops when it comes to wheeling a car over blacked-out roads.

Fvt. Jim Castleberry was a U. of Alabama law student; Pvt. Junius McCrackin, a newspaper cartoonist; Fvt. Pete Smith, a farmer; Sgt. Ed Swann was going up fast in a Birmingham investment house; Pvt. Homer Kerlin, a Georgia cracker who enlisted "just for fun"—this man's army comes in all shapes and sizes, from all sorts of backgrounds.

The officers are just men, too. Maj. W. K. Miller is a 3-year-old Orlando architect, former city councilman. Left all that and wife to go to war. He doesn't believe it to go for a soldier when his guard unit was called up.

Jack Chilton—captain—was a Birmingham distillery agent. Left two children, a fine job, to wade in the mud. Capt. Harry M. Doster—"Pop"—edited a country weekly outside Montgomery. Pop served his time in the World War, could have resigned when the guard was called. Felt responsible for the kids he'd urged to enlist, so he came along.

That's a quick look at some men in a typical company. Multiply it by a million, guys from everywhere, and there's your new army.

packages. They are made to feel noble by public respect for the service they are giving their country.

Towns and cities close to army camps have taken on the responsibility for seeing that the young men don't pine away from homesickness but are provided with inexpensive entertainment. They are given a chance to meet the local girls, who make them feel even more than the speeches of politicians that they are heroes.

Everybody appreciates the situation of the soldier. But so far there has not been any concern shown for the plight of the unmarried girls who are also "of draft age."

If they haven't actually lost a certain young man to the draft they at least are facing the prospect of fewer dates and less fun.

But no home town committees are figuring out how to ease the loneliness of these girls or how to provide them with inexpensive forms of recreation.

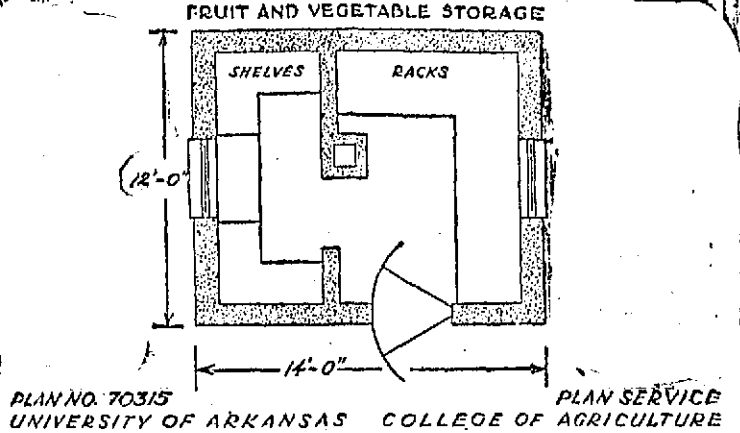

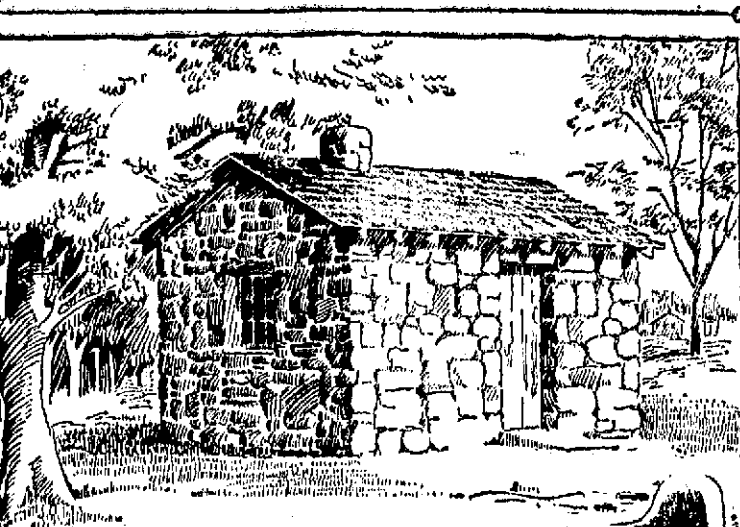

Their futures are just as uncertain as the futures of the young men—since most of them want to marry. They haven't a very good chance so long as most of the young men they know have either been called in to the army or face the prospect of being called. But the girls don't seem to get any sympathy.

Their families are so busy talking about the sons away at camp and worrying over present problems and their futures that the girls are considered lucky because they can get jobs, though what they want are husbands.

It's no wonder you often hear a girl of between 20 and 25 declare that she thinks her own position is as tough as that of any trainee she knows.

She is in a tough spot—and nobody is concerned about it but herself.

Food Products Storage House

Storage of home-produced products is a difficult problem for many. Arkansas farm families. Basement storage, food pantries in the house, or underground cellars or caves are used when available. However, where these facilities are not available, a separate food storage house is a satisfactory solution. In Arkansas, the above-ground storehouse, if built of heavy materials and well insulated, may be used throughout the year. The chimney is used principally as a ventilator, although a small amount of heat may be needed in extremely cold weather. Native rock, logs, or double walls with sawdust, shavings, or packed straw are recommended. Some form of insulation under the roof is desirable. The two rooms in this plan provide for storage of fruit, vegetables, or bulk supplies in one room and canned goods on shelves in the other. This plan is one of a series of more than 100 plans of farm buildings and equipment prepared by the University of Arkansas College of Agriculture for farm people. A plan service handbook and drawings may be obtained from your county agent and home demonstration agent.

U. S. Producing

(Continued From Page One)

machinery to build the nose and center sections of Martin medium bombers, which will "be faster than most of the pursuit ships now being used in Europe."

The complexity of this construction is suggested by the fact that 11,500 separate parts are required for this built and assembled complete with instruments and radio equipment in this Detroit plant. Meanwhile, Good year will be building the wings, and Hudson will be building the tail assembly. To a new Martin plant now, send the completed sections. There, they will be put together, two 1800-horse power motors and guns installed, then flown from Omaha to destination.

The mechanics had never seen one. First job was to take it apart and

country. All she could do was wait.

CHAPTER VII
\$50 REWARD will be paid for information as to the present address of Hans Stadl, former resident of this city, now believed to be in Texas. It is important that Mr. Stadl be contacted immediately. Box 18701.

WANT-AD ROMANCE
By TOM HORNER

KAY watched a workman lay shingles over the patched hole in the laboratory roof. Below him, in the rebuilt room, Joe and Ted—drafted as an assistant and thoroughly enjoying it—were trying to solve the puzzle of Wondrosap. There would be no more explosions. Joe had taken care of that. The acid was carefully locked in a cabinet, well away from the warehouse full of Wondrosap. And Joe was careful, now, not to leave open cans of Wondrosap around where spilled reagents might drop into them.

She pondered Joe's discovery. Was it just one of those "lucky accidents" that turn failure into fortune, or had Tim Donovan fully realized all the properties of his product? Hans Stadl might supply the answer.

If they could find Hans Stadl. Although the old German chemist had lived for years without walking distance of Donovan's factory, one seemed to know exactly where he had gone. A neighbor said he was a widower that he had gone some place in Texas to visit his children. He might have heard of Tim Donovan's death, decided to remain in the west.

An increasing fear troubled Kay. Perhaps her father had not known of Wondrosap's explosive properties, perhaps he had envisioned it only as the cleaner he claimed it to be. Had Hans Stadl changed the formula, prepared this gigantic arsenal of potential destruction for some foreign sabotage ring?

But her father could not have been misled that easily. He knew chemistry as much as Hans Stadl. This cleaner was his last, his greatest dream.

Kay was glad that she had warned Joe and Ted and Mary not to mention the fact that Wondrosap had exploded. Even Mike Flynn and the other attorneys believed that the blast was only a laboratory accident. To reveal Wondrosap as a super-explosive now might bring government agents, restrictions, even confiscation of her property.

Better, too, not to mention any of her fears, even to Ted, until there was some word from Hans Stadl. Then they might be able to trap members of the ring—if such existed.

There should be some trace of Hans Stadl soon. Mike Flynn was advertising in papers all over the

Russians Take

(Continued From Page Four)

said to be ablaze. Bombs, which were said to be Russians, fell Sunday on Tehran, Iran's capital, marring armistice negotiations. Some civilian casualties were reported.

The start of the third year of war found the German army conquerors of land of 160,000,000 persons, locked with the Red army in a campaign so intense that German people begin to doubt the year 1941 would bring a great victory.

There's the nickel, the toughening element in tank steel, near Ufaei, copper near Kyshtym, and aluminum near Kamenek. Magnatogorsk lies beside a veritable mountain of iron ore more than 70 per cent pure. The city did not exist before the revolution now is believed to be turning out close to 10,000,000 tons of pig iron annually. (Reports have not been sent by the Russian government since 1934.)

The growth of the cities of the Urals since 1929 is regarded by economic experts as a fair index of the capacities of that area to supply Rus-

siya's war machine. Magnatogorsk has come up from nothing to 146,000. The 10 key cities all have doubled in size, some of them have trebled and quadrupled.

The unofficial capital of the Urals is Sverdlovsk, where seven rail lines converge. One of them down from the mining areas of the north is electrified to handle the heavy pull over the mountains.

Next in importance is Chelyabinsk, the point where the core of the double-tracked Russian rail system starts the long pull across Siberia. The fly in the ointment for Russia, so far as the Urals are concerned, is their newness. This industrial area is not yet fully developed.

The United States and Great Britain are mapping their aid to Russia largely on the reports of Ural industrial capacity. Bearing on the matter, too, is the question whether Stalin, pressed hard enough might not make peace with Hitler. Some democratic quarters believe he would not do this under any circumstances, basing their conviction on the theory that both Communism and Stalin himself would fall, never to rise again, if he compromised with any invader.

It was as if a full can of Wondrosap had exploded in their faces. They had counted so on Hans Stadl being able to tell them everything about the cleaner-explosive, and he knew no more than they did—if as much.

"Don't you know what was in it?" Kay asked. "Surely you must have mixed it, or helped Dad. We have to know."

"The formula was Tim's secret. Not even me would he tell. He mixed it himself, kept it locked up all the time. I did not try to find out. Tim had discovered it. The formula belongs to him and to Miss Katie."

"A catalytic agent," Joe murmured. "Something we probably never heard of. But it does the trick!"

"Is there any way of finding out what this formula is, how it is made, Mr. Stadl?" Kay pleaded.

"Of course, of course." The old German smiled at them. "Tim knew about his bad heart. He wrote everything down for you, told me where he had hidden it. You'll find everything you want to know in the old wasteland in his bedroom."

"The old wasteland?" Then a silence.

"I'm going wasteland hunting," Ted broke in. "I'm going to corner the market on old wastelands."

"There are thousands of them." "But only one with that formula in it. And we'll get that one back."

Kay hoped he was right. But it was so easy to imagine someone else finding those papers, destroying them. And if someone had, the secret of Tim Donovan's discovery might be lost forever.

(To Be Continued)

study every one of the 500 parts of the clock-like mechanism. Then drawings had to be made of them. Of course the Bofors, being Swedish in origin, had its every dimension scaled in the metric system. To make drawings intelligible to American workmen, every dimension had to be translated into American standard measurements. It took six weeks just to do that, and that is regarded as a phenomenal performance. So you can see where time goes.

Also it required 70 machines just to make the gun-barrel alone. Four hundred of the machines in the gun plant were adapted from existing machinery in the auto plants, and moved in from there. But another two million dollars' worth of machinery had to be bought, some of it specially designed. These 40-mm. anti-aircraft guns, pilot models of which with mounts by Firestone are under test, are regarded as already greatly improved over the Bofors-British-Canadian gun, and will be in production at what used to be Ford's old Highland Park plant as soon as field tests of the pilot models are completed.

Modestly, almost apologetically, in the midst of these impressive demonstrations of military productions, Detroit auto-makers are introducing the 1942 model cars of which neither they nor anybody else yet knows how many will ever be produced. "The defense stuff comes first," says Keller, and they all agree.

Style Is Easy in England

Due to Fact That No One Has a Thing to Wear

By MARGARET BUNNELLE
Wife of Robert E. Bunelle, Chief of London Associated Press Bureau
LONDON—It isn't considered good taste in England any more to be too fussily dressed, too nicely manicured, too perfectly coiffured.

Partly because women have been too busy with more important things, partly because many beauty operators have gone to war jobs and partly because beauty aids are scarce and clothes are rationed, women have been going in more and more for utility and simplicity in personal appearance.

A submarine commander's wife who once spent much of her time in beauty parlors and fashionable clothing salons, and now is working at the Admiralty, expressed the war time Englishwoman's attitude this way:

Uniforms in Vogue
"In the first place, rarely have time to change clothes between the office and parties, and even if I had I'd feel self-conscious if I tried to look like a Molyneux model among war workers in uniform, particularly at a time when there are so many who have lost not only their clothes but their homes as well."

The beauty parlors, where prewar women spent hours leisurely trying out new aids to beauty, are taking a back seat. They are short-handed and so short of supplies you have your choice of eating your eggs or taking them to the hairdressers for an egg shampoo.

Cosmetics early became scarce. They are no longer imported from France, and the best known British brands are exported to the United States to obtain dollar exchanges.

Hair-Do Regulations
When it was announced that certain cosmetics no longer would be imported or manufactured, many women rushed to stand in line to buy up supplies of their favorite creams, lip rouge and eye makeup. Now that they are running low, even those who still have them are using less and less.

With so many women in war work, makeup as a whole is losing its importance. In some branches of women's service there are strict regulations about hairdo and amount of makeup.

A woman ambulance driver showed me the latest thing in cosmetics for the services—a small leather kit with powder, rouge, lipstick, mirror, comb, from her job to social retentiveness nail file and skin cleanser. She said it was a "lifesaver" for rushing from her job to social engagements.

Although clothes rationing created some problems, it has eliminated others by enforcing simplified wardrobes, and there's not so much emphasis on style. Many women are digging out old clothes to have them made over.

Forman Wear Forgotten
Everyone is planning her wardrobe for long wear, for it is necessary to figure out how to make your clothing coupons cover a year's supply, allowing for seasonal changes and for the things that wear out more quickly,

style's war machine. Magnatogorsk has come up from nothing to 146,000. The 10 key cities all have doubled in size, some of them have trebled and quadrupled.

Streetcar Brides Fashionable in Basel

BASEL, Switzerland.—(AP)—Lack of gasoline for auto wedding processions has inspired the streetcar people to furnish a special car for bride and bridegroom. Provision is made also for refreshments on the way to or from the church.

Economy being the motive, the wedding coach is hooked on behind a regular passenger trolley. It runs right on schedule, even if the bridegroom is late.

"Does your husband tell you his troubles?"
"Oh, yes, whenever I want to buy anything."

Why is it that moths seldom make the mistake of eating a patch?

such as stockings, lingerie, shoes and gloves.

Formal clothes have nearly gone out of use, and most entertaining is informal because people find it impractical to use their coupons for anything they don't wear regularly. Sales people say that now that women have to buy fewer clothes they are buying more expensive ones because they last longer.

Some women are having their legs sprayed with water-proof suntan paint in place of stockings and others are buying curtain materials, which are unrationed, and having them made in to summer dresses.

Farmers Should Take Advantage of Egg Prices

Improved Breeding This Fall Advised by

The farmer who takes advantage of good egg-price prospects by raising fall-hatched pullets of improved breeding to add to his laying flock next spring, will be helping his country as well as himself, says Oliver L. Adams, county agent.

Uncle Sam wants eggs for national defense food, and this demand is expected to maintain egg prices at profitable levels for at least two years. Fall-hatched chicks will increase the size of a farm flock at a time (in spring) when culling and winter losses may have reduced the number of layers by as much as 25 per cent. Fall rearing also provides more pullets without additional brooding equipment, and labor.

Experiments have shown that well-managed fall-hatched pullets give satisfactory egg production. Egg weight does not come up to normal as early as it does with spring-hatched pullets, but these smaller eggs are produced at a time when the price differential between pullet eggs and large eggs is relatively small.

Local farmers are advised to purchase chicks for fall brooding from hatcheries having a sound breeding program such as those cooperating in the National Poultry Improvement Plan, a cooperative effort to improve flocks under the supervision of official State Agents and the U. S. Department of Agriculture.

Chicks sired by U. S. Record of Performance or other equally good pedigree males are likely to give high egg production. One way to be certain that the chicks are sired by R. O. P. males, cockerels from hens laying 200 or more eggs a year, is to purchase them from U. S. Certified or U. S. Verified hatcheries, a list of which can be obtained from the County Agent. R. O. P. sired chicks also are produced by many U. S. Approved hatcheries.

Mind Your Manners

Test your knowledge of correct social usage by answering the following questions, then checking against the authoritative answers below:

1. In badminton do the losers or winners of one game get serve in the next game of the rubber?
2. Should you take anyone in a canoe who doesn't know how to swim?
3. If you are a guest in another person's boat, should you obey any safety rules the owner suggests?
4. Should a girl playing ping pong with a man expect him to pick up all the balls that fall to the floor?
5. Should two players try to play golf with one set of clubs? What would you do if—
On a golf course you find a ball with a name or initial on it—
(a) Turn it in at the clubhouse?
(b) Put it in your own bag?

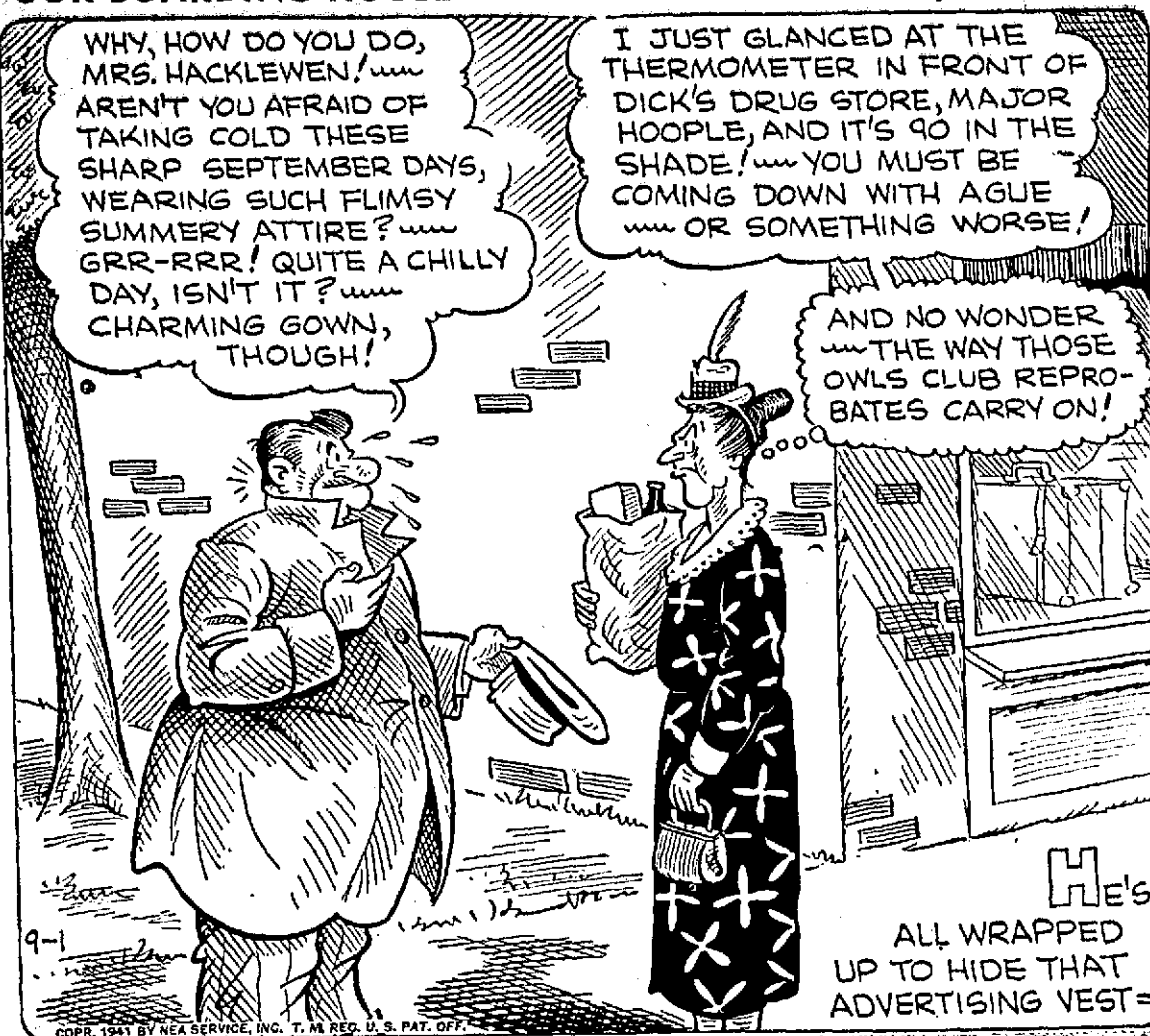

- Answers
1. The winners.
 2. No.
 3. Yes.
 4. No. She should pick up the balls that fall on her side of the net.
 5. No. For it slows down the game and isn't fair to the players behind them.

OUR BOARDING HOUSE

with . . . Major Hoople

OUT OUR WAY

By J. R. Williams

Edson in Washington

All of the News From Capital Corners

Henry W. Wallace's new Economic Defense board, made up of all the cabinet members except Miss Perkins and which is supposed to do all the high powered planning for the waging of economic war, won't get going for several weeks because Milo W. Perkins, the man Wallace named as executive director, is still recovering from a long illness.

Appointment of Perkins was considerable of a surprise, but it is significant of what can be expected when the board starts rolling. Wallace and Perkins are Department of Agriculture buddies and Perkins currently has the title of surplus mar-

keting administrator. Only 41, he was born in Milwaukee, went to high school there, then became a big salesman and manufacturer in Texas. It was from this job that he was called to the Department of Agriculture.

One of his pet beliefs is that the challenge of this generation is to learn to distribute what we have learned to produce. Perkins has been doing something about that through his work in AAA and SMA, but what he does about it on a world recovery basis will have to await his own personal, physical recovery.

Design for Distribution
A new pattern for a planned post-war economy was dropped into the laps of students at the Southern Farm Bureau training school in Hot Springs, Ark. when Assistant Attorney General Thurman W. Arnold made a talk down there on "Monopoly and the South." Main theme of Arnold's speech was that for the last 20 years the industrial east has been exploiting the south and the west as raw material colonies. He paid his respects to capitalists and labor unions which by monopolies bar farmers and consumers from advantages of modern efficiency.

"Suppose," he said, "that a list of civilian necessities were selected. Clothes, a minimum standard house, the essentials of diet, drugs and fuel. Suppose we should say to the consumers that the government would do its best with price ceilings on commodities in general, and in addition would standardize particular products and see that they get around at the lowest available prices.

"This would involve, in the case of a suit of clothes, the use of priorities to aid those who are willing to manufacture a serviceable article at a low price. It might involve encouragement of the manufacturer through government financing. It would certainly involve elimination of all restraints of trade which stood in the way of distribution of the minimum standard house or the minimum suit or clothes.

"If the American people can be sure of the minimum necessities, they will be more willing to go without the luxuries. Here is a technique in which the farmers of America, who have to go without luxuries anyway, should be interested."

The New Deal, as you can see, isn't dead yet.
Bad News for Ducks
With practically everything else in the world running short, duck hunters will get some consolation this

fall from the fact that instead of being held down to a daily bag limit of three canvasbacks and ruddy ducks, the quota will be 10. But the use of cattle, horses or mules as blinds will be prohibited. And it's none other than Hard Boiled Harold Ickes who lays down these regulations, in his role as boss of the fish and wildlife service.

Panty Waists
The War Department, faced with a shortage of qualified Army instructors last year, put into production a series of training films, Hollywood co-operating, to show how to ski, how to care for a trench mortar, how and why of saluting, dangers of venereal disease, and so on. Sound films were made on the horrors of war—dive bombers, exploding shells, machine gun fire—to season and psychologically condition the troops.

Some of these films were given a preview in Washington the other night. Everyone took the horrors of war film all right, but when one of the other films was shown, a lieutenant colonel and a sailor fainted dead away.

The Scoreboard

With His Cosmic Theory, Prof. Brown Is Only Showing Nova What Gibson Told Leonard

By HARRY GRAYSON
NEA Service Staff Editor
POMPTON LAKES, N. J.—Lou Nova isn't simply seeking publicity when he speaks of his hypothetical powerhouse and illustrates his cosmic clouds.

Joe Louis' challenger is convinced heavyweights and fighters in general—from Jim Figg to John L. Sullivan—had better balance than those of today.

Nova realizes that speed, first accentuated by Jim Corbett, took boxers from the flat to the balls of their feet, and that they no longer can walk in as straight as a string without getting their heads knocked off.

What Nova is striving to attain, with the coaching of Prof. Walston Crocker Brown, who saw his need for it, is a happy medium.

Professor Brown who has an exhibit at the Rockefeller Museum of Science and Industry in New York, went back to the ancient Greeks for his system, but all he is trying to show Nova is what Billy Gibson used to tell Benny Leonard in much simpler language.

"Now when you get this dude in the right spot," Will Gibson whispered to Leonard, "grip that canvas with your toes and yet him have it on the old potato."

Fabric Labels Are Important to Buyers

Shoppers Who Inspect Labels Get More for Their Money

The shopper who knows the meanings of the words found on garment and fabric labels can make her money go farther, suggests Miss Mary Claude Fletcher, county home demonstration agent.

Definitions have not been agreed upon for all textile terms but the trend is for standards—for names and terms that let women know just what they are buying. For such standards to be used most effectively, it will be necessary for women to learn the meanings as they are agreed upon, Miss Sue Marshall, of the University of Arkansas College of Agriculture, suggests.

Yarn counts, two-by-two ply, reprocessed wool, and lists are just a few examples of the textile terms that do have clear-cut meanings, the Extension Specialist in clothing and household arts, points out. A fabric with a higher yarn count has yarns closer together, and, other things being equal, it will be stronger and more durable. Manufacturers often fill the air space between yarns of low count fabrics with a starch mixture, called filler, sizing, or loading. Often this sizing washes out in the first or second laundering. Then, for the first time, the woman recognizes the poor quality of the fabric she purchased.

If the yarn count is noted while shopping, and if the woman knows what the yarn count should be in the fabric for good quality, she is not so likely to be fooled in the excess sizing.

This fall, according to Miss Marshall, it will be easier for shoppers to determine the kind of wool used in making almost all woolen fabrics or garments, because a new act of Congress, the Wool Products Act, went into effect July 14.

The act calls for labels that tell whether the fiber used for the product was new, reprocessed or reused wool. Also labels will have to tell if other fibers such as cotton, silk, or rayon have been used with the wool, the extension specialist, says.

On the Theory Of Kill Or Cure

KINSTON, N. C.—(AP)—Gleen Swicegood, farm agent, tells of a man whose children had been plagued with summer colds and bought a herd of goats to cure the "kiddies' colds."

The man said he had heard many times that a cold would not stay on the same premises with a goat. When I arrived at his house a week later three of the goats were gambling on the top of an automobile and a couple were wrecking a rose arbor—but the children's colds were gone."

Dodgers and Yanks Near Million Mark

NEW YORK—Dodgers and Yankees are certain to exceed a million in home attendance this season. Brooklyn played to 919,349 in 28 games at Ebbets Field, while the Yankees saw the American League leaders in 55 contests at Yankee Stadium.

perfecting his series of dynamic punches with a paddle 28 inches long and with a white cover. Ray Arcel nearly breaks his arm daily holding the stick out there and moving it around.

Nova feels the device helps him get proper leverage with his right hand. He jabs the board with his left, blazes away with the right and follows with a left hook.

Arcel, one of the better trainers, sees no harm in this . . . points out that Professor Brown's scheme actually has improved Nova's balance.

The collection formerly was a sort of waddler. At times it appeared as though he had two left feet.

The stick is an eye sharpener if nothing else, so Nova may be contributing something worth while.

Few warriors have introduced anything new in conditioning since George Dixon—Little Chocolate—innovated shadow boxing.

Every fighter trains differently. Jim Corbett advised against skipping the rope . . . held it was bad for the heart. Johnny Dundee closed all the gymnasium windows and jumped rope for 45 minutes at a crack.

Jack Sharkey warned against punching the heavy bag after he developed a tennis elbow at that violent exercise. The Gob's right arm actually became shorter than his left. Jack Dempsey, Leonard and other ringmen did not consider a workout complete without a long session with the big bag.

Until Max Baer's father stopped it, Mike Cantwell hurled a heavy medicine ball against his big boy's body while he lay flat on his back. Competent trainers shrank with horror at the sight wondering how Cantwell figured all that jarring did Baer's insides any good.

Sparring partners were just that with Gene Tunney, who brought in Shakespeare and the 12 and 18-pound books. Dempsey belted sparring mates out, held them up, shook their heads clear, and socked 'em again.

Harry Gehl and Mike Rosenbloom did the bulk of their road work on dance floors, seldom went near a gymnasium.

The Pittsburgh Windmill and Slapsie Macie got results, so no one criticized their methods.

Certainly the studious Nova is better off dabbling with cosmic punches of an afternoon in the open air than he would be doing the Congo or rhumba in a stuffy night club.

Professor Brown has at least succeeded in helping Lou Nova keep his active mind on his work.

And, provided a fighter has the equipment, that happens to be the main idea.

Pattern for Invasion of Iran

Iran, modern Persia, is in peril of becoming the war's next battlefield if axis and anti-axis troops clash for control there. Map shows how Germans might attack to establish bases for drive on British-controlled east, how British and Russians might move in to keep the Nazis out.

Harrison in Hollywood

By PAUL HARRISON, NEA Service Correspondent

She Didn't Even Know Her Own Name

HOLLYWOOD—On the "Louisiana Purchase" set, which is a New Orleans street just now with a lot of Mardi Gras floats and celebrants, I was saying how-have-you-been to a reddish-haired, beautiful actress in a voluminous blue dress. There was quite a lot of din while we chatted, and an assistant director was wandering around hollering for someone named Margaret Hayes.

Presently a man came up and said to the blue-gowned gal, "Pardon me, but they're calling you," and Miss Hayes dashed off in a fluster at having forgotten her own name.

You couldn't blame her for not remembering—she has had five names definitely and scores of others tried out at rechristening pow-wows. In Puttville, Pa., about 24 years ago she was born Florette Regina Ottenheimer, but by the time she had become one of the most popular models in New York, and was getting stage ambitions, she realized that Ottenheimer would be a tough moniker to put into lights. So she reached into the family tree and plucked out DeBussy.

DeBussy Too Fussy
The gang around the Stork Club, where all heads frequently turned to watch her coming in for dinner with some lucky lad, decided that "Florette DeBussy" sounded too deliberately

theatrical, and emerged from a tangle with "Dana Dale."

So Dana Dale made several screen tests in New York and finally went to Warner Brothers on the usual stock contract. Nothing much happened, so one day when she wasn't busy posing for leg art she went over to Paramount and got a job. Everything was dandy except her name; the studio had been plugging Virginia Dale for a couple of years, so Dana's last name was switched to Edwards. And then, just as she was getting used to it the studio announced: "Dana Dale hereafter will be known as Margaret Mayes instead of Dana Edwards."

Hollywood always has figured that names are extremely important for players as well as picture titles, though there's no rule for determining what will click. Numerologists get rich figuring out attractive tags for glamorists and aspiring heroes, but just about the only good example that the pseudo science can claim is "Dana," which was devised by the numerologist secretary of Edna May Durbin's agent. The best screen name in town, according to most actors' estimates, is "Clark Gable," and that's his own.

Don't Make It Legal
Looking over the constellation, it seems very few stars retain the names

under which they started life. Yet few of the changes have been made legally, and checks and contracts still are signed with original family names which would mean nothing to the fans.

Quite a few names which usually are considered masculine have been tacked on young actresses lately. Gene Tierney always makes me think of Gene Tunney. And Warners are plugging statuette Alexis Smith. Virgil sang of a beautiful youth named Alexis, but the contemporary Alexis is a blond actress.

For names that stick in one memory, though, I like G. O. Dull, a new producer at Metro, and T. Hec, a director for Walt Disney.

The only teacher who isn't underpaid is experience.
